

CHEMFLO Filter Vessel Housings Filter and Coalescer Vessels Informational Sheet

HF Series Filter Vessels:

620, 640, and 660 Elements for flow rates above 200 gpm - all Alloys
Smaller Vessels = Capital Cost Savings
Fewer Elements = Operating Cost Savings

Non-Standard Filter Vessels:

High Pressure
High Flow Rates
Vertical and Horizontal
(We are excellent at larger vessels.)

Filter Vessels - 2.5" OD Element Vessels:

10, 20, 30, and 40 Inch Elements
DOE and Code 2, 3, 7, and 8

Sanitary

Electropolished/Triclover:

1 - 21 Around - 316SS
ASME Code Industrial
3-101 Around - all alloys

Non-code

1, 3, and 5 Around - CS and 300 Series SS

FRP Filter Vessels:

Code and Non-code
HF Series, Cartridges, #2 Bags

Bag Filter Vessels:

#1, #2, and #4 bags - all alloys
Sanitary Electropolished/Triclover
Single around
ASME Code:
Up to 54" diameter
Non-code
Single and 3 around

Liquid-Liquid Coalescer Filter Vessels:

ASME Code, Non-code - all alloys
Filter/Separators - from 50 gpm to 10,000 gpm
3-Stage Separators - Vane/Mesh
Pad+Coalescer Cartridge+Separator

Gas/Air Coalescer Filter Vessels:

Single Element Air In-line to High Pressure
Three-stage Natural Gas Separators
